

FGC LIMITED

Precision Auger Manager

Controls up to 10 individual augers via AMM-1 modules

Up to 8 point maximum run time curve allowing to automatically increase the run time to match increases in feed intake of growing hogs.

10 time clock outputs with up to 24 on/off cycles per day

Auger Manager displays:

- Current auger operating status
- Today's auger run time
- Today's auger off time

Auger Manager monitors and gives an alarm for :

- Maximum run time
- Maximum off time
- Communication problem between auger module and control

Chain Disk Controller

The APCD-500 features a 24-hour clock and actuator outputs, making it ideal for automated feeding in breeding and farrowing facilities.
