

# FGC LIMITED

We provide a farrowing triple drinker, with a nipple for a sow, a nipple for piglets and an additional drinker into the feeder operated by the ball valve, which allows the farmer to provide the lactating sow with extra water with feed.

Stainless steel bowl drinkers are available for nursery, finishing and sows. Our nipple drinkers are made of stainless steel and are adjustable in height. The drinkers can be single or double.

We have a large selection of nipples for any stage of pig growth.
